

GUEST LECTURE

Wednesday, 4th March, 2009

10:30 – 11:30

LYCETT ROOM, RICHMOND CAMPUS

**'Lyons Electronic Office (LEO),
the world's first business computer'**

Dr Janet Delve

**Principal Lecturer, Creative Technologies
University of Portsmouth**

The lecture focuses on the Lyons Electronic Office (LEO), the world's first business computer. It was used to control all aspects of tea-handling and formed an early Decision Support System (DSS). Although much work has been done on the other LEO programs (payroll, etc.), the tea-handling program has been neglected until now.

A Guest Lecture organised by the Department of Arts & Sciences
